AI Trust Infrastructure for India

Research-backed products that bring verification, reliability, and governance innovations to India's unique context. **Production-ready AI for regulated industries.**

THE CHALLENGE

87% of AI projects fail to reach production. Indian enterprises face additional complexity: unique bias categories (caste, religion, region), 22+ official languages, and evolving regulations (DPDP, RBI, SEBI, AICTE). India doesn't need AI that works in demos. India needs AI that works in production.

WHO WE ARE
India subsidiary of Rotascale, bringing global AI trust research to the Indian market

OUR FOUNDATION
Peer-reviewed research from RotaLabs, published methods you can verify

OUR FOCUS
Regulated industries: Banking, Insurance, Government, Healthcare, Education

Six Products for AI Trust

Integrated products that solve AI governance at the architecture level. Not point solutions bolted on after the fact—infrastructure designed from the ground up for AI that works in production.

01

Vishwas

Trust, Fairness & Explainability. Bias detection for Indian demographics: caste, religion, region, gender, economic status. RTI-ready explanations in 22 languages.

02

Guardian

AI Reliability Monitoring. 96% accuracy detecting sandbagging, hallucination, and drift. Continuous monitoring with <50ms latency overhead.

03

Dastavez

Document AI + Browser Agents. Multi-script OCR for Indian documents. Intelligent automation for government forms and enterprise workflows.

04

Sankalp

Sovereign AI Gateway. Route AI through India-hosted infrastructure. Data sovereignty with trust monitoring and compliance built in.

05

Orchestrate

Multi-Agent Platform. Trust Cascade routing for cost-effective AI. Enterprise governance with visual builder and audit trails.

06

Gati

Fleet & Mobility Intelligence. Multi-agent AI for logistics and EV fleets. Route optimization, driver support in 22 languages.

The enterprises that master AI governance now will define the next decade. The rest will spend it catching up.

Research Foundation

Every product built on peer-reviewed research from RotaLabs. We don't just claim—we prove. Our methods are published and open for verification.

Indic Eval Benchmark

Evaluation framework for 22 Indian languages plus code-mixed variants. The standard for measuring AI performance in Indian contexts.

Indian Bias Taxonomy

Research on bias categories unique to India: caste, religion, region, gender, economic status. Beyond Western bias frameworks.

Built for Indian Regulations

Indian AI compliance isn't optional. Our platform is designed from the ground up to meet the requirements of India's regulatory landscape—not adapted from global products as an afterthought.

Financial Services

- RBI AI/ML Guidelines
- SEBI Algorithmic Trading
- Model Risk Management
- Fair Lending Requirements

Data Protection

- DPDP Act 2023
- Data Localisation
- Consent Management
- RTI Transparency

Government

- MeitY Guidelines
- CERT-In Requirements
- GI Cloud Certification
- Public Sector Procurement

Insurance

- IRDAI AI Guidelines
- Claims Processing Rules
- Underwriting Fairness
- Fraud Detection Compliance

Healthcare

- ABDM Integration
- CDSCO Requirements
- Clinical AI Standards
- Patient Data Protection

Education

- AICTE AI Curriculum
- UGC Guidelines
- NEP 2020 Alignment
- Student Data Privacy

Deployment Options

Choose the deployment model that meets your data residency and security requirements. All options include full compliance support.

AWS Mumbai
Fastest time-to-value. Fully managed by Rotavision.

Azure India
Enterprise integration. Active Directory and M365.

GI Cloud
Government-approved. MeitY empanelled infrastructure.

On-Premise
Air-gapped deployment. Strictest data residency.

Why Indian Context Matters

Bias Categories Are Different

Western AI bias tools detect race and gender. India needs detection for caste, religion, region, and economic status. Vishwas is built for Indian demographics.

Languages Are Complex

22 official languages, hundreds of dialects, code-mixing everywhere. Indic Eval benchmark ensures AI actually works in how Indians communicate.

The Right Partner for Indian AI

We're not another AI vendor. We're engineers who understand what regulated Indian enterprises actually need—and we have the research, products, and local presence to deliver it.

Research-Backed

Every product built on peer-reviewed methods from RotaLabs. Verify our approaches before you deploy.

India-First Design

Not global products adapted for India. Built from the ground up for Indian languages, biases, and regulations.

Local Presence

Offices in Bengaluru, Mumbai, and New Delhi. 24/7 IST support. India-based delivery teams.

Professional Services

- Strategy & Assessment (₹12-20L)
- Advisory Retainer (₹6L/month)
- AI Trust Transformation
- Implementation (₹25L+)
- Training & Certification
- Managed Services

Industries We Serve

- Banking & Financial Services
- Government & Public Sector
- Telecommunications
- Automotive & EV Fleet
- Insurance
- Healthcare
- Education
- Manufacturing
