You're Trusting Providers on Faith

When government departments and enterprises use AI from OpenAI, Azure, or any provider, they're taking the provider's word for everything. **There is no independent verification.**

Provider Says "Compliant"

You signed a contract. They showed certifications. But you have no real-time proof that your data policies are being followed right now.

No Independent Evidence

If something goes wrong, you have provider logs—written by the provider. No independent audit trail. No sovereign proof.

Annual Audits, Daily Risks

Compliance audits happen yearly. AI decisions happen every second. By the time you discover a violation, the damage is done.

Trust Without Verification

You're accountable to citizens for AI decisions. But your only evidence is "the vendor told us they're compliant."

The question isn't whether your AI provider is compliant. The question is: [Can you prove it?](#)

The Sankalp Solution

Sankalp sits between your organization and AI providers— independently enforcing policies, monitoring compliance, and generating sovereign proof.

Every request verified in real-time

Policy enforcement at your gateway, not at the provider's discretion.

You control the audit trail

Independent, sovereign evidence. RTI-ready. CAG-ready documentation.

Continuous compliance monitoring

Not annual audits—every AI interaction checked against your policies.

Violations blocked before they happen

PII detected and masked. Policy violations stopped at the gateway.

Capabilities

01

Reliability Monitoring

Guardian-powered drift detection. Hallucination alerts. Quality scoring.

02

Compliance Automation

DPDP Act, RBI, SEBI, IRDAI pre-configured. Consent verification.

03

Cost Intelligence

Smart routing to cost-effective models. Budget controls by department.

04

Complete Audit Trail

Every query logged with attribution. RTI-ready exports. CAG documentation.

05

Multi-Model Routing

Route to the right model. Automatic failover. No vendor lock-in.

06

Data Sovereignty

India-hosted processing. Cross-border blocking. Complete localization.

AI PROVIDERS (INDIA REGION)

OpenAI Anthropic Google Gemini Azure AI Sarvam

Pre-Configured Compliance

DPDP Act 2023

- Purpose limitation enforcement
- Consent tracking & verification
- Data localization compliance
- Erasure request support

RBI AI Guidelines

- Algorithmic accountability
- Complete audit trails
- Bias monitoring
- Model governance

SEBI Regulations

- Fair treatment documentation
- Decision transparency
- Communication logs

IRDAI Guidelines

- Non-discrimination verification
- Claims audit trail
- Underwriting transparency

MeitY Standards

- Government AI requirements
- Testing documentation
- Incident response readiness

RTI & CAG Ready

- Every decision documented
- Reasoning chains logged
- Export in required formats

Comparison

Capability	Standard Sovereign Cloud	Sankalp
Data stays in India	Yes	Yes
Reliability monitoring	No	Guardian-powered
Compliance tracking	Manual	Automated, continuous
Cost optimization	No	Smart routing (30-50% savings)
Audit trails	Basic logging	RTI-ready, CAG-compliant
Independent verification	Trust provider	Verify yourself

Deployment & Integration

Cloud Gateway

AWS Mumbai. Fastest deployment. Managed by Rotavision.

Private Cloud

Deploy in your VPC. Enhanced control. Custom rules.

On-Premise

Your data center. Air-gap capable. Maximum sovereignty.

GI Cloud

MeghRaj deployment for government requirements.

Drop-In Integration

Minimal changes to existing code. Sankalp is OpenAI API-compatible—change the base URL, keep your code.

- OpenAI-compatible API
- LangChain ready
- Infrastructure as Code (YAML)
- Python, Node.js, Java, Go SDKs
- Enterprise SSO (SAML, OIDC, AD)
- Prometheus, Grafana, Datadog

Government-Ready

- GeM procurement available
- STQC alignment
- NIC / MeghRaj hosting supported
- eSign & DigiLocker integration

Ready to Take Control?

Stop trusting. Start verifying.
